FREES UP OFFICE SPACE, IMPROVES PRODUCTIVITY, ENHANCES SCALABILITY

79%

organisations feel that digital transformation is important to the future of their organisation.

4.2
TIMES

The mass of incoming business information (vs current volume) that is expected to grow by 2021.

75%

organisations say it is a problem to manage the documents necessary for process workers to get their job done

ECM is no one single technology. Rather, it is an amalgamation of strategies, tools & methods that affect the capture, collection, data extraction, processing, storage and delivery of information, involving all stakeholders every step of the way.

50%+

organisations see document automation as "highly important" or "a deal changer"

ECM's biggest strength is the integration of a robust search facility (with OCR) that can scour both structured & unstructured data ensuring the right content is always available at the right time.
