Dispatcher
Phoenix

CREATING DIGITAL WORKPLACE

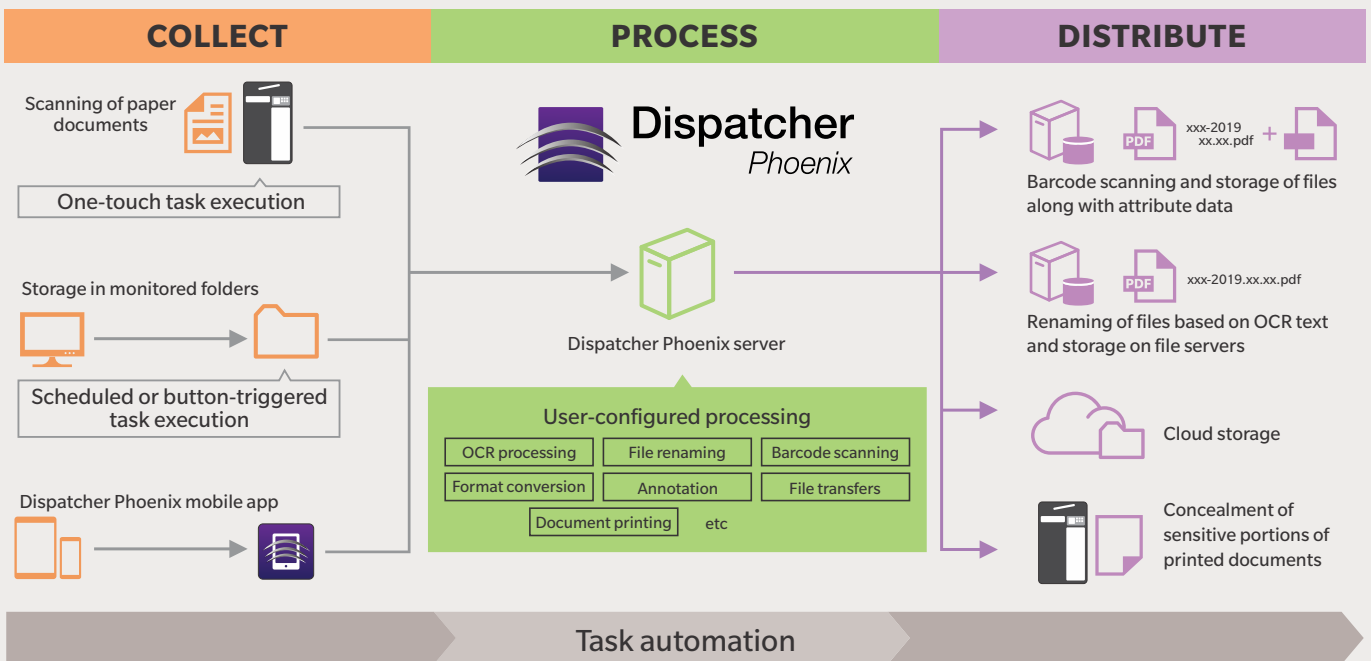

ARE YOU FACING THESE CHALLENGES?

- Does your business deal with data extraction/classification of paper documents?
- Are your business processes inefficient due to time consuming data entry tasks?
- Do you require a lot of manual resources to handle manual document centric processes?
- Do you manually submit information in Email/File Systems/Business Applications?

I N T R O D U C I N G

Dispatcher Phoenix

Dispatcher Phoenix is a powerful document capture application that helps organisations save time by automating document scanning, data extraction & processing and information delivery through configurable workflows. It is scalable and can be integrated with several input and output channels making it a powerful tool to automate document centric workflows. Dispatcher Phoenix fulfils information capture in three steps.

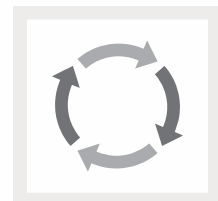

COLLECT

Dispatcher Phoenix allows document capture through multiple channels such as Input Folder, MFP, Workstation, Email, Dropbox, Dispatcher Phoenix Mobile, etc.

PROCESS

Dispatcher Phoenix allows users to create dynamic document processing workflows, providing capabilities such as Auto-Document Classification, Data Extraction, Image Enhancement, Document Annotations and Formatting.

DISTRIBUTE

The processed data and documents can be delivered to several channels such as ECM repository (FingerTips, SharePoint and other CMIS compliant ECM repositories), Business Application (ERP, CRM, BPM platform, etc.), Email and Output Folder.

WHY DISPATCHER PHOENIX?

SPEED

Speed up your workflow with Konica Minolta Dispatcher Phoenix, a powerful document workflow application that automates and streamlines printing, routing and image processing within the office. Users can also access cloud services like Dropbox, One Drive, Google Drive, SharePoint and Box from the Konica Minolta bizhub MFP control panel. Printed and scanned documents can be stored in the online storage that facilitates information sharing and streamlines work duties. With its friendly features, Konica Minolta Dispatcher Phoenix can handle various document processing needs with ease.

FLEXIBILITY

Easy to use and powerful solution, Konica Minolta Dispatcher Phoenix converts the documents into the format you need so that you can utilise the documents effectively. Scanned paper documents can be converted to Microsoft Office formats which are in very common use. Text sections of documents can also be processed via OCR and converted into files consisting of text data, which further increases the range of applications available for the documents. With a variety of processing features, you can add watermarks, annotations and rename the files to route documents to folders, FTP servers, MFPs or email recipients automatically.

FULL INTEGRATION WITH MFP

The application integrates with bEST (bizhub Extended Solution Technology), a suite of cutting-edge technologies that bring the power of the PC to Konica Minolta devices. You can scan documents into your workflow directly from the MFP control panel, index your documents or browse through your PC's folder structure to choose a folder to store your documents.

SIMPLICITY

Automate your most time-consuming tasks, eliminating the need for manual intervention. Automatically collect, process, and distribute files. And the graphic-based Workflow Builder Tool, featuring drag-and-drop functionality, customisable icons, drawing tools, and easy-to-follow validation messages, makes creating your workflows easier than ever.

FLEXIBLE SCHEDULING

Schedule network-intensive processes after hours to maximise network performance and free up bandwidth during workday. The Workflow Scheduler has both standard and advanced options, allowing you to choose the specific days and / or times that your workflow should run. You can also choose to run the workflow continually while the PC is on, even when the Dispatcher Phoenix application is not open.

BUSINESS BENEFITS

- Leverage faster ROI and cost-effective operations with centralised and automated document centric workflows
- Improve business efficiency by automating time consuming manual activities such as data extraction, document classification, data entry & delivery
- Scale business by optimising overall process SLAs and resources utilisation thus enhancing the capacity to handle additional transactions
- Increase speed through faster extraction & delivery of information from documents, while keeping the occurrence of errors in the captured data to a minimum

CUSTOMER TESTIMONIAL

Konica Minolta's Dispatcher Phoenix has automated our manual document capture and data extraction of physical HBL documents (Tax Invoice, Delivery Order, Packing List, etc.) while reducing the process TAT by more than 95% and improving overall business efficiency.
